

Dual Fuel Smart Meter Installer (Electricity and Gas) - Tools for Endpoint Assessment

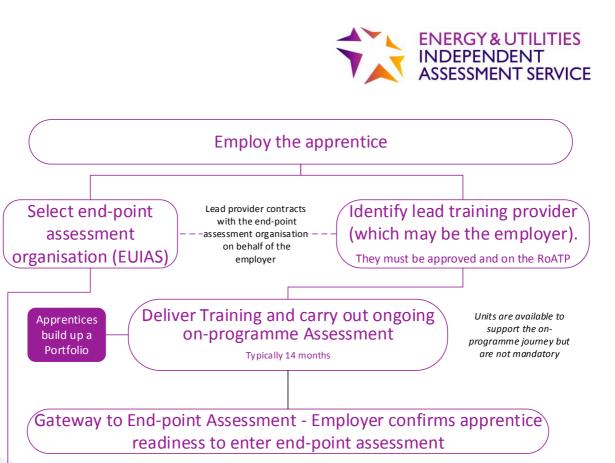

End-point assessment is the final part of an Apprenticeship Standard, designed to independently assess an apprentice's knowledge, skills and behaviours that have been learnt throughout the apprenticeship. The purpose of the assessment is to make sure the apprentice meets the standard, set by employers, and are fully competent in the occupation.

Before they can enter end-point assessment, the apprentice must have:

- 1. Completed all their learning
- 2. Achieved Gas Safe ®
- 3. Achieved MOCoPA
- 4. Achieved maths and English at level 1

There are 6 elements to the assessment in this Standard, which can be taken over up to a 3 month period:

- 1. Work Observation (in a live working situation)
- 2. Final review
- Portfolio Assessment and preliminary grade(contains the evidence of experience gained in the workplace and simulated environments, witness statements, reflective journals, the final progress review and the work observation) – 80% weighting towards the final grade (awarded a pass, fail or distinction)
- End-point Interview and preliminary grade (designed to question the apprentice based on their portfolio evidence) – 20% weighting towards the final grade (awarded a pass, fail or distinction)
- 5. The employer must hold a quality assurance meeting to review the preliminary grades and examine evidence
- 6. The final grade decision will be made by the end-point assessment organisation at moderation.

Final Review

Work Observation

Undertaken by line manager/trainer, safety or quality assurance engineer, in a live working situation.

EUIAS provide standardised recording documentation.

Portfolio Summative Assessment
