

Electrical Power Network Engineer - Asset Management Engineer Technical Interview Assessment Checklist

During the Technical Interview process each apprentice will be interviewed on the content of their work log which will contain evidence from a minimum of 5 of the more complex work activities which they have undertaken during their on-programme work period. The work log should contain written accounts of activities that have been completed and referenced against the relevant skills, knowledge and behaviours of their job role as identified in Annex A of the Assessment Plan. The work log should be supported by relevant supporting evidence, such as photographs, work instructions, safety documentation, project plans and reports. In addition, progress review documentation demonstrating the apprentice's development and progression through their apprenticeship should be included.

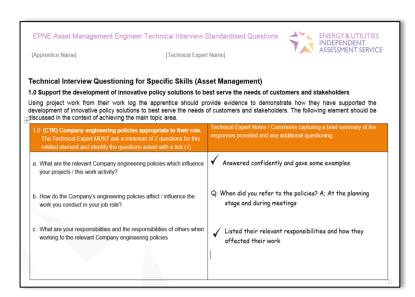

The interview discussion should be conducted in the context of each apprentice's specific job role using the Specific Skill (SS) topic areas identified in Annex A of the Assessment Plan. The interview discussion should encompass the relevant supporting Core Technical Knowledge (CTK), Core Skills (CS) and supporting behaviours through the use of the standardised questions provided for each of the relevant elements which support the scenario being discussed. Where necessary, additional questioning should be conducted by the Technical Expert to probe further into the detail of the topic area and activities being discussed. Wherever possible the interviewers questioning should be contextualised to the apprentice's job role and the specific work activities they are presenting from their work log.

Specific Skill (SS) Scenario Questioning - Asset Management

The interview should be framed around the 3 scenario job specific question areas shown below. Using each scenario in turn as the basis for the interview, the apprentice should present evidence to demonstrate how they have developed their skills, knowledge and behaviours for each scenario being discussed. The interviewer should use this document to confirm and record the apprentice's achievement against the requirements of the criteria for each element.

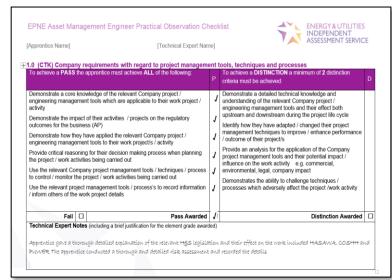

- 1. Support the development of innovative policy solutions to best serve the needs of customers and stakeholders
- 2. Support the identification of new and existing innovation projects
- 3. Identify the implications of the next generation of low carbon energy and how it influences the way the network is operated

Technical Expert Guidance

The Technical Expert should ask the apprentice to provide evidence from their work log to support each of the main topic areas included in their interview. The relevant elements which support the main topic area are provided and contain three standardised questions for each element. The Technical Expert should use each element to support the discussion of how the main topic area was achieved. The Technical Expert should select a minimum of **TWO** of the element questions and ask these in the context of the main topic area in addition to any of their own specific questioning of the discussed activity. The Technical Expert should annotate the assessment document to identify which questions were asked and provide a brief summary of the response given.

Rules of Element Achievement

During the interview the Technical Expert should use the Technical Interview Checklist to check the apprentice's responses against each elements criteria which will help the Technical Expert to make an assessment decision for the element being discussed which will contribute to their final grade. To achieve a PASS in an element, the apprentice must provide sufficient evidence to achieve ALL of the given PASS criteria and give satisfactory responses to a minimum of 2 of the standardised questions provided. To achieve a DISTINCTION in an element the apprentice must first achieve a PASS and demonstrate further sufficient evidence to achieve a minimum of 2 of the given DISTINCTION criteria. The Technical Expert should provide brief comments on the assessment paperwork of the factors which influenced their element grade decision of either a Fail, Pass or Distinction.

Technical Interview Criteria for Specific Skills (Asset Management)

1.0 (CTK) Company engineering policies appropriate to their role

		apprentice must achieve ALL of the following iew by providing evidence which demonstrates:	Р	To achieve a DISTINCTION a minimum of 2 distinction criteria must be achieved during the interview process:	D	
A working knowledge of the relevant Company engineering policies which are applicable to their work projects / job role and the importance of complying with them				A detailed knowledge and thorough understanding of the relevant Company engineering policies which are applicable to their work projects / job role and the effect		
Their ability to link the compliance with tecl		ork to Company strategies and policies ensuring				
	ied th	ne relevant Company engineering policies to their		they have How they have used their knowledge to ensure that other parties involved in their work project/s comply with the relevant Company engineering policies during their work projects How they have appropriately challenged / reported incidents of non-compliance with the relevant Company engineering policies when identified How they have used their knowledge of relevant		
	How they have used their knowledge of the relevant Company engineering policies to support the work planning / decisions they have made in their job role			incidents of non-compliance with the relevant Company		
				How they have used their knowledge of relevant		
				engineering policies to make suggestions which have		
				influenced or led to an improved performance		
Fail		Pass Awarded		Distinction Awarded
