

Street Works Certificates for Operatives and Supervisors

(England)

Currently delivering Street Works training or considering adding a Street Works offering for your clients? EUIAS is here to help. We are an Ofqual recognised awarding organisation committed to supporting skills development for those working in the energy and utilities industries.

Our highly experienced and technically competent EQAs will be available to provide advice and guidance to get you up and running efficiently through Centre approval, and to support you throughout our quality assurance processes.

Our knowledge tests are online, which you can schedule when your learners are ready. Online results and feedback reports are available to help you to support your learners to progress.

What are they?

We are approved to deliver Street Works Operative and Supervisor Certificates. Upon successful completion of the Street Works Certificate(s), learners will receive a qualification certificate from EUIAS. Individuals, their training provider or employer can then separately apply for a SWQR card.

Learners must complete the Key Certificates before progressing onto the additional Certificates, for both Operative and Supervisor.

Key Certificates:

Operative	Supervisor
Location and avoidance of underground apparatus	Location and avoidance of underground apparatus
Signing, lighting and guarding	Monitoring signing, lighting and guarding

Additional Certificates:

Operative	Supervisor
Excavation in the highway (England only)	Monitoring excavation in the highway (England only)
Reinstatement and compaction of backfill materials	Monitoring reinstatement and compaction of backfill materials
Reinstatement of sub-base and base in non-bituminous materials	Monitoring reinstatement of sub-base and base in non-bituminous materials
Reinstatement in cold-lay bituminous materials	Monitoring reinstatement in bituminous materials
Reinstatement in hot-lay bituminous materials	
Reinstatement of concrete slabs	Monitoring reinstatement of concrete slabs
Reinstatement of modular surfaces and concrete footways	Monitoring reinstatement of modular surfaces and concrete footways

Who are they aimed at?

The Certificates in Street Works for Operatives and Supervisors meet the requirement within The New Roads and Street Works Act 1991 (NRSWA) for a qualified Operative to be on site at all times when street works are in progress. The Act also requires that the site is supervised by a person who holds the relevant Supervisor Certificates.

Each Certificate provides learners with the underpinning knowledge, understanding and skills required for each activity performed by Operatives and Supervisors working in Street Works.

When do they expire?

Street Works Certificates are valid for five years.

Learners can renew their Street Works Certificate within the five years' by completing the EUIAS Re-assessment of each Certificate. If a learner wishes to renew outside of the five years then a full Certificate must be completed.

How are the Certificates assessed?

EUIAS Street Works Certificates are assessed through both an online multiple choice test and a practical observation. Re-assessment Certificates are assessed through the online multiple choice test only.

What do I need to do next?

To find out more about our competitively priced Street Works offer, and how to become an approved Centre to deliver Street Works with EUIAS, contact us at qualifications@euias.co.uk or visit our website: euias.co.uk/qualifications.
