Updates to the supporting documents

Since the first publication of the EUIAS Water Treatment Technician (WTT) Supporting Documents – Water Treatment Technician; Water Treatment Equipment Technician; Legionella Risk Assessor; Water Treatment Operations Supervisor, the following updates have been made.

Version	Date first published	Section updated	Page(s)
V1.2	August 2024	Practice multiple-choice test updated	15, 25
V1.1		Number removed from a bullet point	53
V1.0	March 2024	First published	All

Appendix A: Glossary

Amplification – provides more detail on how individual knowledge, skills or behaviours statements should be interpreted. Where the KSB statements, themselves are deemed self-explanatory, no amplification is provided. Assessment may include questions on anything identified in the amplification

Behaviours (as part of KSBs) – specific mindsets, attitudes or approaches identified as part of the apprenticeship standard that must be evidenced during endpoint assessment

Elements – are the knowledge, skills and behaviours and what is needed to competently undertake the duties required for an occupational standard

Gateway - the stage of the apprenticeship where the apprentice, employer and training provider determine whether the apprentice is ready to undertake end-point assessment

Guidance – is only provided where it is required to support interpretation of the KSB statements

Knowledge (as part of KSBs) – specific information, technical detail, and 'knowhow' identified as part of the apprenticeship standard that must be evidenced during end-point assessment

Pathways – a specialist route within an apprenticeship standard that builds on the occupational competence for a new entrant to the occupation

Skills (as part of KSBs) – the practical application of knowledge identified as part of the apprenticeship standard that must be evidenced during end-point assessment

Standard – An occupational standard is a description of an occupation. It contains occupational profile, and describes KSBs needed for someone to be competent in the occupation's duties. Occupational standards are developed by employers for occupations that meet the Institute for Apprenticeships and Technical Education current occupation criteria

Topic - is a collection of elements grouped into a theme e.g. Health and Safety

Appendix B: Gateway Eligibility Form

(Standard Version: ST0453 version 1.0; Assessment Plan Version: ST0453/AP01)

Apprentice's name:	Apprentice's job title:
Name of Employer:	Name of Training provider:
Employer representatives present:	Training provider representatives present:
Apprenticeship start date:	Apprenticeship on-programme end date:
Gateway meeting date:	
Has the apprentice taken any part of the end-point assessment for this apprenticeship standard with any other End Point Assessment Organisation?	Y/N
If "Yes" please give details:	

Apprentice's details

Eligibility requirements:

The apprentice must confirm their achievement of the following:

Eligibility requirement	Achieved by the apprentice? Y/N	Evidence (Scans of certificates MUST be included)
Achieved Level 2 English or higher		
Achieved Level 2 Maths or higher		
Compiled and submitted a portfolio of evidence that meets the specification requirements, on which the professional discussion will be based		

Gateway Eligibility Declaration

- 1. The apprentice, the employer and the training provider must sign this form to confirm that they understand and agree to the following:
- 2. The apprentice has completed the required on-programme elements of the apprenticeship and is ready for end-point assessment with EUIAS.
- 3. EUIAS has been informed about any reasonable adjustment and/or special considerations requests.
- 4. The apprentice will only submit their own work as part of end-point assessment.
- 5. All parties agree that end-point assessment evidence may be recorded and stored by EUIAS for quality assurance purposes.
- 6. The apprentice has been on-programme for a minimum duration of 365 days.
- 7. The apprentice has achieved English and maths Level 2 or higher as detailed in this document.
- 8. The apprentice has compiled and submitted a competent portfolio of evidence, on which the professional discussion will be based.
- The apprentice, if successful, gives permission for EUIAS to request the apprenticeship. certificate from the ESFA who issue the certificate on behalf of the Secretary of State.
- 10. The apprentice has been directed to the EUIAS Appeals Policy and Complaints Policy.
- 11. The employer/training provider has given the EUIAS at least three months' notice of requesting this EPA for this apprentice.
- 12. If the Gateway Eligibility Report is not completed in full, meeting all requirements, and submitted to EUIAS, the end-point assessment cannot take place.

Appendix C: Practice Multiple-choice Test

Level: 3

Water Treatment Technician

Supporting Document: Practice Paper

This practice paper reflects the type of questions in the live multiple-choice test, which can be taken as an online test or paper-based test.

This examination consists of 30 multiple-choice questions.

A Fail is awarded if the apprentice has not achieved at least one mark in each section and/or has achieved 17 or less correct answers.

The Pass mark is 18 correct answers.

The Distinction mark is 25 correct answers. .

The duration of this examination is 60 minutes.

You must use a **pencil** to complete the answer sheet - pens must NOT be used. When completed, please leave the examination answer sheet and question paper on the desk.

For this paper:

- access to reference books or materials is NOT allowed
- access to the internet or intranet is NOT allowed

For each question, fill in ONE answer ONLY.

If you make a mistake, ensure you erase it thoroughly.

You must mark your choice of answer by shading in ONE answer circle only. Please mark each choice like this:

MARKING INSTRUCTIONS	
ⓐ ⑤ ● ANSWER COMPLETED CORRECTLY	
Examples of how NOT to mark your examination sheet. These will not be recorded	
⑤ ⑤ ⑥ DO NOT partially shade the answer circle.	
⊗ ⑤ ⊗ DO NOT use ticks or crosses.	
⑤ ⑤ ⑥ DO NOT use circles.	

You may use this page for rough work. This page must not be removed.

Section 1: Chemical reactions involved in the corrosion and scaling processes in water systems

Question 1	
What ch	emical reaction occurs at the anode of a galvanic cell where two different
metals a	re in contact with an electrolyte?
Possible	e answers
a)	Reduction
b)	Oxidation
c)	Hydrolysis
d)	Neutralisation

Question 2

Galvanic corrosion cells can be caused by two different metals in contact with an electrolyte.

Which ONE of the following metals would corrode the quickest in contact with stainless steel?

Possibl	Possible answers		
a)	Copper		
b)	Cast iron		
(c)	Steel		
d)	Aluminium		

Questio	Question 3	
Identify	Identify the cause of physical damage to pump impellers.	
Possible answers		
a)	Differential aeration	
b)	Microbiologically influenced corrosion	
c)	Cavitation	
d)	Differential metals	

Question 4		
Which C scale?	Which ONE of the following reactions represents the formation of an aragonite scale?	
Possibl	Possible answers	
a)	$Ca(HCO_3)_2 > CaCO_3 + CO_2 + H_2O$	
b)	2NaHCO ₃ > Na ₂ CO ₃ + CO ₂ + H ₂ O	
c)	$2OH^{-} + 10Ca^{2+} + 6PO4^{3-} > Ca_{10}(PO4)_{6}(OH)_{2}$	
d)	$Na_2CO_3 + H_2O > NaOH + CO_2$	

Questio	n 5
	NE of the following conditions causes carbon dioxide solubility to
decreas	e?
Possible answers	
a)	Increasing temperature
b)	Decreasing temperature
c)	Increasing pressure
d)	Decreasing flow

Section 2: Inhibition methods for the reduction of corrosion of different metals

Question 6		
What is >60°C?	What is the effect on dissolved oxygen levels in a vented calorifier storing water at >60°C?	
Possible answers		
a)	Levels of dissolved oxygen are not affected	
b)	Levels of dissolved oxygen are reduced to 0ppm	
c)	Levels of dissolved oxygen increase	
d)	Levels of dissolved oxygen decrease	

Questio	Question 7		
Which ONE of the following is an anodic corrosion inhibitor in steel closed cooling systems?			
Possibl	Possible answers		
a)	Calcium carbonate		
b)	Zinc		
c)	Tolytriazole		
d)	Sodium nitrite		

_					_
()	116	est	10	n	ж
w	ut	- 31	ıv		

Corrosion can be caused by two different metals in contact.

Which ONE of the following metals would cause corrosion of copper when connected to it?

Possible answers	
a)	Steel
b)	Brass
c)	Stainless steel
d)	Aluminium

Question 9

What is the minimum pH of water in closed systems containing aluminium or aluminium alloy components to avoid corrosion?

aluminium alloy components to avoid corrosion?		
Possibl	Possible answers	
a)	4.5	
b)	7	
c)	8.5	
d)	10	

Section 3: Inhibition methods for the reduction of different scale types in specific water systems

Question 10			
Threshold scale inhibitors can be described as agents that:			
Possibl	Possible answers		
a)	affect the process of crystal growth at very low concentrations without		
(a)	being consumed in the reaction		
b)	absorb onto the surface of particles using charges to repel interaction and		
b)	prevent scale		
6)	prevent the formation of scale deposits by reacting with Calcium		
c)	Carbonate at a ratio around 1:5		
d)	decrease the surface tension or interfacial tension between a liquid and a		
	solid preventing scale		

Question 11			
In large,	In large, hard water-fed, cooling systems why might strong acids be dosed		
continuo	usly?		
Possible answers			
2)	The continuous addition of acid reacts with calcium and magnesium to		
a)	form a compound that prevents scale formation		
b)	The continuous addition of acid can be used to modify the LSI and		
b)	minimise scale deposition		
(0)	The continuous addition of acid prevents the growth of bacteria like		
c)	Legionella		
4)	The continuous addition of acid acts as a threshold scale inhibitor		
d)	minimising scale deposition		

Questic	Question 12		
Which C	Which ONE of the following situations would facilitate the use of chelating agents in		
high pre	essure boilers?		
Possib	Possible answers		
a)	Very low hardness and a lack of oxygen allows careful and controlled stoichiometric dosing		
b)	Poor oxygen scavenging will not affect chelant requirements		
c)	The presence of chlorides will improve the performance of chelants		
d)	The presence of high dissolved iron will reduce the amount of chelant required		

Question 13		
Describe the action of sodium hexa-metaphosphate in the wholesome water scale		
control process.		
Possible answers		
a)	It increases dissolved carbon dioxide levels to reduce the LSI (Langellier Saturation Index)	
b)	It is a pH modifying agent for control of calcium carbonate precipitation	
c)	It is a threshold scale inhibitor for control of calcium carbonate precipitation	
d)	It is a dispersant to mobilise calcium carbonate particles	

Section 4: Cell structure of waterborne microbes and the interactions with biocidal products used to control them

Question 14		
What is the term used to describe a free-floating microorganism in suspension in water systems?		
Possible answers		
a)	Planktonic	
b)	Sessile	
c)	Eukaryote	
d)	Prokaryote	

Questio	Question 15		
Prokary	Prokaryotic bacteria:		
Possibl	Possible answers		
a)	contain DNA in a nucleus		
b)	contain mitochondria and chloroplasts		
c)	are larger than eukaryotic cells		
d)	are unicellular		

Questio	n 16
What system pH is ideal for the rapid growth of most bacteria found within water systems?	
Possible answers	
a)	<4
b)	4 - 6
c)	6.5 - 7.5
d)	>9

Question 17		
Which ONE of the following is an oxidising biocide?		
Possible answers		
a)	Glutaraldehyde	
b)	Bronopol	
c)	Chlorine dioxide	
d)	Isothiazolinones	

Question 18	
Identify ONE system problem that can occur due to the presence of a biofilm.	
Possible answers	
a)	Increase in corrosion inhibitor levels
b)	Under-deposit corrosion
c)	Increase in flow through system pipework
d)	Increase in efficiency at heat exchange surfaces

Section 5: The concepts of flow and heat transfer in water systems and how they affect water treatment processes

Question 19	
Which ONE of the following Reynolds numbers would indicate fully turbulent flow?	
Possible answers	
a)	0 Re
b)	0 Re to 2,000 Re
c)	2,000 Re to 4,000 Re
d)	>4000 Re

Question 20		
Which ONE of the following conditions would predominantly encourage the		
formation of biofilms in pipework? Possible answers		
a)	Varying flow	
b)	Turbulent flow	
c)	No flow	
d)	Transitional flow	

Question 21	
How is heat energy predominantly removed from an evaporative cooling system?	
Possible answers	
a)	Convection
b)	Latent heat loss
c)	Radiation
d)	Conduction

Question 22	
Increasing temperature in a vented calorifier will result in which of the following?	
Possible answers	
a)	Reduced levels of dissolved carbon dioxide
b)	Increased levels of dissolved carbon dioxide
c)	Reduced levels of dissolved sodium
d)	Reduced levels of dissolved chloride

Section 6: Ion transfer technologies, including resin and membranebased systems, used to change water quality

Question 23	
What type of ion exchange resin is contained in a conventional water softener?	
Possible answers	
a)	Anion resin
b)	Cation resin
c)	Mixed bed resin
d)	Epoxy resin

Question 24		
In a twin bed demineralisation process a strong cation exchange resin is normally regenerated using which ONE of the following?		
Possible answers		
a)	Citric acid	
b)	Oxalic acid	
c)	Sulphuric acid	
d)	Phosphoric acid	

Question 25		
Which ONE of the following dissolved molecules will NOT be removed by reverse osmosis?		
Possible answers		
a)	Sodium chloride	
b)	Carbon dioxide	
c)	Calcium bicarbonate	
d)	Magnesium chloride	

Question 26		
Which ONE of the following processes would be used to remove remaining total dissolved solids following reverse osmosis?		
Possible answers		
a)	Base exchange softening	
b)	Activated carbon filtration	
c)	Electrodeionisation (EDI)	
d)	Anion exchange resin	

Section 7: The use of specialised analytical equipment for the testing in field of water samples

Question 27		
	Which ONE of the following standards provides the minimum performance	
requiren	nents for onsite analysis of water in closed heating and cooling systems?	
Possible answers		
a)	HSG274	
b)	BS 7592	
c)	BS 8552	
d)	BS ISO 5667-5	

Question 28	
How often would a technician expect to calibrate pH meters that are used intermittently?	
Possible answers	
a)	Calibrate before each use
b)	Calibrate annually
c)	Calibrate weekly
d)	Calibrate monthly

Question 29	
Which ONE of the following test methodologies can be used to measure total alkalinity?	
Possible answers	
a)	Drop test kit
b)	pH meter
c)	Thermometer
d)	Refractometer

Question 30					
Why is	Why is it important that dipslides are not shaken after immersion in the sample?				
Possible answers					
a)	To avoid contamination of media by air				
b)	To ensure the correct amount of fluid is retained on the media				
c)	To avoid media drying out in the incubator				
d)	To enable incubator temperature to be maintained

Appendix D: Portfolio Mapping Document

This document must be placed at the front of the portfolio and submitted to EUIAS with the portfolio of evidence.

Introduction

Throughout the on-programme part of the apprenticeship, the apprentice will need to keep compile a portfolio of evidence to support the requirements of the professional discussion.

Use this document to map the portfolio of evidence to the KSBs assessed during the professional discussion.

The portfolio mapping document below consists of

- pages 29-32 covering mapping for core requirements
- pages 33-36 covering mapping for the Water Treatment Technician option
- pages 37-40 covering mapping for the Water Treatment Equipment Technician option
- pages 41-44 covering mapping for the Legionella Risk Assessor option
- pages 45-48 covering mapping for the Water Treatment Operations Supervisor option

Apprentices should use the mapping for the core and the option they are following.

Apprentice's next steps

- 1. Complete all the details on the first page and include employer details of where relevant competencies from their experience at work was gained
- 2. Ensure each piece of evidence signed off by their tutor/supervisor/mentor and training provider. The apprentice can use a number of different types of evidence to demonstrate their competence as described in Section 6 of the Specification 'What to include in the portfolio'. For further guidance, the apprentice must seek advice from their tutor/supervisor/mentor and training provider
- 3. Map evidence to the criteria in the following pages using a referencing system indicating where the evidence for the criteria is located in the portfolio e.g., work based evidence Job 1 (J1) page 5 paragraph 2. This will allow the

- independent assessor to locate the section or specific piece of evidence being discussed and referred to during the professional discussion
- 4. Place the portfolio mapping document at the front of the portfolio of evidence.

The apprentice's training provider must make arrangements for EUIAS to have access to the apprentice's portfolio including the portfolio mapping document at Gateway. For those using e-portfolios such as ONEFILE or SMARTASSESSOR, the reference used must simply be the file or folder name you used when uploading the evidence to such systems.

Professional Discussion Grading with Portfolio Mapping

Mapping Sign off on Portfolio Completion:

Apprentice Name (Print)	Apprentice Signature	Training Provider (Company)	Training Provider Signatory	Date of Sign Off

athway

GROUP 1: (Core) Health, Safety and the Environment

Pass Criteria

Comply with company practices, processes and procedures associated with safety.

Demonstrate where they have contributed to the development of an operational solution to a health and safety issue.

Identify the main Health and Safety and compliance requirements of a Water Treatment Technician e.g. Health &Safety at Work Act, L8, BS 2486, BS 8552 etc

Distinction Criteria

Demonstrate an understanding of where to improve Health and Safety within their workplace, including actions taken e.g. where reduced hazards minimised the risk to health or improved the system integrity

Ref.	Apprenticeship Standard Criteria	E' RE	PORTFOLIO EVIDENCE REFERENCE (Apprentice Input	
		1	2	3
7	They should be able to contribute to the			
CS4	development of operational solutions and			
	improvements e.g. safer working practices			

GROUP 2: (Core) Workplace attitude

Pass Criteria

Describe when they have operated as an effective team member and taken responsibility, e.g. when they have made independent decisions and suggested workplace improvements.

Describe the company's policy on ethics, equality and diversity, explaining why this is important, and illustrate this with an example of how they have effectively maintained a good relationship with either a colleague, client, supplier or member of the public.

Demonstrate they have been receptive to feedback, willing to learn new skills and adapted to change.

Demonstrate how they have assessed personal training needs in order to maintain a satisfactory level of competence in their job role e.g. when they have requested external OEM training or specific H&S training e.g. confined spaces

Distinction Criteria

Demonstrate a clear development plan, outlining choices and opportunities available beyond the completion of the apprenticeship. e.g. personal review/assessment of their career progression potential with current employer and within the industry as a whole and what is required to achieve those goals

Ref.	Apprenticeship Standard Criteria	E' RE	ORTFOL VIDENC FEREN entice I	E CE
CS16	Maintain level of competence commensurate with job role. Identify and recognise personal training needs and undertake suitable training when required. Complete and record CPD necessary to maintain and enhance competence		7	
СВЗ	Display a self-disciplined, self-motivated, proactive approach to work, willing to make independent decisions and develop solutions and improvements to work practices			
CB5	Be prepared to work effectively and efficiently maintaining good relationships with colleagues, clients, suppliers and the public			

Ref.	Apprenticeship Standard Criteria	E' RE	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inpu	
		1	2	3
CB6	Be receptive to feedback, willing to learn new skills			
СВО	and adjust to change			
СВ7	Demonstrate adherence to corporate policies on			
	ethics, equality and diversity			

GROUP 3: (Core) Resource Management

Pass Criteria

Explain how their work process, use of resources and management of time is effective. e.g. WTT explain their sample collection and drop off scheduling e.g. WTE describe their equipment parts procurement procedure and work planning e.g. LRA describes the necessary site communication channels for access arrangements e.g. WTS explains the team selection criteria used and the reasons for the organisation of labour on site for the operation

Distinction Criteria

Show an understanding of the importance of effective time and resource management and the implications to themselves and their employer. e.g. cost to the employer of aborted site visits, missing materials and call backs

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Input)		
	Gather system data to enable the correct selection	ı	2	3
	of operational resources that may be required e.g.			
CS5	access equipment (ladders, scaffold or cherry			
	picker)			
	Use resources effectively including their own time			
	management, the appropriate competence of staff			
CS14	chosen for the operation involved, the efficient use			
	of staff resources and management of equipment			
	required for specific work tasks			

GROUP 4: (WTT) Water system surveys, water system requirements and treatment programme design

Pass Criteria

Describe the information to be obtained during a water system survey to enable a water treatment programme to be designed e.g. water make up type, water usage, system operation

Demonstrate how they have correctly applied an understanding of the water treatment requirements for a specific water system. e.g. by explaining programme design calculations and conclusions

Demonstrate how they use the information gathered to design a water treatment programme to meet the requirements, specification or guidance provided, e.g. by explaining the programme design calculations and conclusions

Distinction Criteria

Explain the risks and implications of failure to follow the correct design principles and the likely problems that will occur. e.g. corrosion/scale reducing plant efficiency and lifespan

Describe the maintenance and monitoring programme that can be employed to ensure the continued suitability of the treatment programme. e.g. corrosion monitoring of high risk metals within the system

Ref.	Apprenticeship Standard Criteria	E' RE	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inpu	
		1	2	3
	Understand the water treatment requirements of			
WTT K1	specific water systems e.g. steam boilers,			
	cooling towers etc			
	Design, specify and recommend chemical water			
WTT S1	treatment programmes taking account of water			
	supply quality and system operating conditions			

GROUP 5: (WTT) Evaluate the water treatment programme options for an application

Pass Criteria

Describe the chemical treatment options available for a specific water treatment application e.g. nitrite versus molybdate as a corrosion inhibitor

Describe the physical treatment options available for a specific water treatment application e.g. hard water versus softened water make up for a cooling system

Demonstrate how they have assessed the suitability of the chemical water treatment options in order to solve a technical problem they have encountered e.g. by explanation of the programme design calculations and conclusions

Demonstrate how they have assessed the suitability of the physical water treatment options in order to solve a technical problem they have encountered e.g. by explanation of the programme design calculations and conclusions

Distinction Criteria

Demonstrate how they have evaluated the benefits and drawbacks of different treatment programme options

and

Demonstrate an understanding of the commercial cost implications of treatment options. e.g. through explanation of the comparison of cost benefits of the options in a quotation

Explain the implications of selecting an unsuitable treatment option and how this could be rectified. e.g. incorrect biocide for a closed water system

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inp		E CE
		1	2	3
WTT K2	Understand the treatment options available for specific water systems e.g. pre-treatment plant, chemical treatment etc		7	
WTT S2a	Evaluate the suitability of alternative physical water treatment programmes for specific water systems and applications			
WTT S2b	Evaluate the suitability of alternative chemical water treatment programmes for specific water systems and applications			

GROUP 6: (WTT) Water treatment programme operational performance and assessment

Pass Criteria

Describe the correct performance criteria for the programme type, the tests to be completed and the correct equipment to be used when performing this task e.g. calcium balance to monitor scale inhibition

Demonstrate the evaluation and implementation process that has been completed and explain the conclusions/recommendations arrived at. e.g. by explanation of the customer service report

Distinction Criteria

Explain the risks and implications of poor treatment programme performance. e.g. corrosion/scale reducing plant efficiency and lifespan

Demonstrate an understanding of the potential improvements that could be made to the programme and evaluate the benefits of those improvements e.g. changing from non-oxidising biocide programme to oxidising biocide

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inp		E CE
		1	2	3
CS9	Assessment of relevant test parameters and sampling plan for specific water systems			
CS10	Performance assessment and evaluation of water system conditions and operations utilising specific monitoring equipment			
CS13	Identify, evaluate and resolve practical and technical problems encountered, assess suitability of the chemical and physical water treatment options employed and implement the required improvements to the treatment		,	
WTT K3a	Programme or service delivery Acquire the knowledge required to assess the performance of water treatment programmes			
WTT K3b	Acquire the knowledge required to recommend improvements to water treatment programmes			
WTT S4	Assess the performance of a water system treatment programmes and provide recommendations for improvement			

GROUP 4: (WTE) Water system surveys, water system requirements and treatment programme design

Pass Criteria

Describe the information to be obtained during a water system survey to enable a water equipment installation to be designed e.g. water make up type, water usage, quality requirements

Demonstrate how they have correctly applied an understanding of the water treatment requirements for a specific water system e.g. by explaining programme design calculations and conclusions

Demonstrate how they use the information gathered to design a water treatment installation. e.g. by explaining programme design calculations and conclusions

Demonstrate the knowledge required to install specific water treatment equipment e.g. electrical requirements for a softener installation, or the service parts required

Describe how they have installed and commissioned items of equipment.

Distinction Criteria

Explain the risks and implications of failure to follow the correct design principles and the likely problems that will occur e.g. poor water quality causing deterioration of final product

Describe the maintenance and monitoring programme that can be employed to ensure the continued suitability of the treatment programme. e.g. regenerant usage profile and cost reduction

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inpu		E CE
		1	2	3
WTE K1	Understand the water treatment requirements of specific water applications and processes e.g. water used for pharmaceutical manufacturing, chemical treatment dosing Acquire the knowledge required to install specific items of equipment relevant to their job			
WTE S1	role Complete water system surveys and produce system diagrams appropriate to the presentation of system data e.g. layout of the			
	treatment plant within the system location			

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Input)		
		1	2	3
WTE S3a	Install and commission water treatment equipment			

GROUP 5: (WTE) Evaluate the water treatment programme options for an application

Pass Criteria

Describe the treatment options available for a specific water treatment application and

Demonstrate how they have assessed the suitability of the treatment options e.g. by explanation of the programme design calculations and conclusions

Distinction Criteria

Demonstrate how they have evaluated the benefits and drawbacks of different equipment options

and

Demonstrate an understanding of the commercial cost implications of treatment options e.g. through explanation of the comparison of cost benefits of the options in a quotation

Explain the implications of selecting an unsuitable treatment option and how this could be rectified. e.g. softened water for a sodium sensitive chemical blending plant

Ref. Apprenticeship Standard Criteria		PORTFOLIO EVIDENCE REFERENCE (Apprentice Input)		
		1	2	3
WTE K2	Understand the equipment options available and their relevant benefits			
WTE S2	Evaluate and design appropriate water treatment equipment installations			

GROUP 6: (WTE) Water treatment programme operational performance and assessment

Pass Criteria

Describe the correct performance criteria for the equipment type, the tests to be completed and the correct equipment to be used when performing this task e.g. recovery rate at specific conductivities for Reverse Osmosis plant

Demonstrate the evaluation and implementation process that has been completed and explain the conclusions/recommendations arrived at. e.g. by explanation of the equipment service report

Describe the servicing requirements for a specific item of water treatment equipment e.g. membrane cleaning of a Reverse Osmosis plant

Describe the maintenance requirements for a specific item of water treatment equipment e.g. routine calibration of a pH monitoring system

Distinction Criteria

Explain the risks and implications of poor treatment equipment performance. e.g. poor water quality causing deterioration of customer's final product

Demonstrate an understanding of the potential improvements that could be made to the programme and evaluate the benefits of those improvements e.g. mixed bed polishing unit after Reverse Osmosis for ultrapure water supply

Ref.	Apprenticeship Standard Criteria	E RE	ORTFOL VIDENC FEREN rentice 2	E CE
CS9	Assessment of relevant test parameters and sampling plan for specific water systems			
CS10	Performance assessment and evaluation of water system conditions and operations utilising specific monitoring equipment			
CS13	Identify, evaluate and resolve practical and technical problems encountered, assess suitability of the chemical and physical water treatment options employed and implement the required improvements to the treatment programme or service delivery			
WTE K3b	Acquire the knowledge required to service			

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inpu		E CE
		1	2	3
WTE K3c	Acquire the knowledge required to maintain specific items of equipment relevant to their job role			

GROUP 7: (WTE) Health, Safety and the Environment

Pass Criteria

Apply a safety first approach for themselves and colleagues keeping themselves and others safe

Undertake and document work place risk assessments and hazard reviews in accordance with company procedures

Describe how to supervise the health and safety of a team e.g. ensure all members of the team have the appropriate PPE for the task to be performed

Distinction Criteria

Challenge unsafe practice outside of their immediate control or responsibility and is proactive in resolving those practices e.g. transport of equipment from point of delivery to the site of installation

Ref.	Apprenticeship Standard Criteria	E' RE	ORTFOL VIDENC FEREN entice	E CE
		1	2	3
WTE S5				

GROUP 4: (LRA) Water system surveys, water system requirements and treatment programme design

Pass Criteria

Describe the major elements of a water system and their design e.g. storage tanks, calorifiers, thermostatic mixer valves in a hot water system

Describe how they prepare water system diagrams. e.g. schematic drawings produced by computer aided design software

Distinction Criteria

Explain the risks and implications of failure to follow the correct design principles and the likely problems that will occur .e.g. implications of health scare to customers business

Describe the monitoring programme that can be employed to ensure the continued suitability of the risk assessment. e.g. the effectiveness of remedial engineering actions taken

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inp		CE CE
		1	2	3
	Understand the principles of design for water			
LRA K4	systems and water treatment equipment e.g.			
	water tanks, calorifiers, softeners etc			
LRA S2	Prepare water system diagrams and drawings			

GROUP 5: (LRA) Evaluate the water treatment programme options for an application

Pass Criteria

Demonstrate the understanding of the application of a water treatment programme e.g. chlorine dioxide dosing to a cold water supply system

Demonstrate the identification of remedial, improvement and management actions. e.g. by explanation of the recommendations given in a risk assessment

Distinction Criteria

Explain the implications of selecting an unsuitable treatment option and how this could be rectified .e.g. continuous dosing of a silver stabilised peroxide to a potable water system

Demonstrate an understanding of the cost implications of recommended remedial actions e.g. comparative cost of tank refurbishment versus replacement

Ref.	Apprenticeship Standard Criteria	PORTFOL EVIDENC REFEREN (Apprentice I		E CE
		1	2 3	3
LRA K3	Understand the application of water treatment programmes for specific water systems			
LRA K5	Acquire the knowledge required to recommend remedial actions, optional system improvements and management requirements			
LRA S4	Identify remedial, improvement and management actions required to minimise any risk presented			

GROUP 6: (LRA) Water treatment programme operational performance and assessment

Pass Criteria

Describe the correct performance criteria for the system type, the tests that may be completed to assess this and the correct equipment to be used when performing this task e.g. legionella testing of a hot water system

Describe the risk assessment principles that they use e.g. risk values weighted by local population of site e.g. by explanation of the risk assessment report findings and recommendations

Demonstrate the evaluation and implementation process that has been completed and explain the conclusions/recommendations arrived at. e.g. by explanation of the risk assessment report

Distinction Criteria

Explain the risks and implications of poor treatment programme performance. e.g. the commercial implications of health scare to the customer's business

Demonstrate an understanding of the potential improvements that could be made to the programme and evaluate the benefits of those improvements e.g. continuous biocide dosing to hot and cold water systems where legionella are prevalent

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inp		CE
		1 2	3	
CS9	Assessment of relevant test parameters and			
C59	sampling plan for specific water systems			
	Performance assessment and evaluation of			
CS10	water system conditions and operations utilising			
	specific monitoring equipment			
	Identify, evaluate and resolve practical and			
	technical problems encountered, assess			
CS13	suitability of the chemical and physical water			
C313	treatment options employed and implement the			
	required improvements to the treatment			
	programme or service delivery			
	Understand the principles of risk assessment			
LRA K2	and the identification of hazards in water			
	systems			

Ref.	Apprenticeship Standard Criteria	E' RE	RTFOL VIDENC FEREN entice	E CE
		1	2	3
LRA S3	Assess the comparative risk of Legionellosis presented by specific water systems			

GROUP 7: (LRA) Health, Safety and the Environment

Pass Criteria

Identify the main Health and Safety and compliance requirements relevant to the production of a legionella risk assessment

Distinction Criteria

Challenge unsafe practice outside of their immediate control or responsibility and is proactive in resolving those practices e.g. identifies health risks associated with a water system not directly linked to the legionella risk assessment process and brings this to the attention of the client

Ref.	Apprenticeship Standard Criteria	E' RE	ORTFOL VIDENC FEREN rentice	CE ICE
		1	2	3
	Know and understand any regulatory			
LRA K1	requirements and guidance appropriate to the			
	water systems being assessed			

GROUP 4: (WTS) Water system surveys, water system requirements and treatment programme design

Pass Criteria

Describe the information to be obtained during a water system survey to enable a water system cleaning programme to be planned e.g. system access points, drainage, power supply

Demonstrate how they have correctly applied an understanding of the water treatment requirements for a specific water system. e.g. from the system condition report, operative reports, analytical reports

Distinction Criteria

Explain the implications of selecting an unsuitable treatment option and how this could be rectified e.g. non-dynamic flushing of a multiple floor heating system

Explain the benefits for the customer of completing the cleaning procedure e.g. improvement in heat transfer processes derived from a cleaning procedure

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Input		E CE
		1	2	3
	Understand the water treatment requirements			
WTS K1	of specific water systems e.g. drinking water			
	systems, process water systems etc.			
	Understand and apply chemical cleaning and			
WTS S2	disinfection programmes for specific water			
	systems			

GROUP 5: (WTS) Evaluate the water treatment programme options for an application

Pass Criteria

Describe the treatment options available for a specific water treatment cleaning application e.g. removal of suspended solids from a closed system

Describe the treatment options available for a specific water system disinfection application e.g. sodium hypochlorite versus hydrogen peroxide for mains disinfection

Distinction Criteria

Explain the risks and implications of failure to follow the correct cleaning programme and the likely problems that will occur. e.g. incorrect cleaning programme closing down production process and consequent losses to both the customer and the employer

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inp		E CE
		1	2	3
WTS K2a	Understand chemical cleaning programme options for specific water systems and processes			
WTS K2b	Understand disinfection programme options for specific water systems and processes			

GROUP 6: (WTS) Water treatment programme operational performance and assessment

Pass Criteria

Describe the correct performance criteria for the operation type, the tests to be completed and the correct equipment to be used when performing this task e.g. iron levels during a dynamic flushing operation

Describe how they have installed and commissioned operational equipment

Demonstrate the evaluation and implementation process that has been completed and explain the conclusions arrived at e.g. by explanation of the job completion report

Distinction Criteria

Explain the risks and implications of poor cleaning operation performance. e.g. incorrect cleaning programme closing down production process and consequent losses

Demonstrate an understanding of the potential improvements that could be made to the water treatment programme on a cleaned system e.g. side stream filtration to remove suspended solids

Ref.	Apprenticeship Standard Criteria	PORTFOLIO EVIDENCE REFERENCE (Apprentice Inp		E CE
		1	2	3
CS9	Assessment of relevant test parameters and			
	sampling plan for specific water systems			
	Performance assessment and evaluation of			
CS10	water system conditions and operations utilising			
	specific monitoring equipment			
	Identify, evaluate and resolve practical and			
	technical problems encountered, assess			
CS13	suitability of the chemical and physical water			
0313	treatment options employed and implement the			
	required improvements to the treatment			
	programme or service delivery			
	Acquire the knowledge required to assess the			
WTS K3	performance of water treatment			
	cleaning/disinfection operation			

WTS S3a	Install and commission temporary operations equipment required to complete the project e.g. flushing pump stations, side stream filtration, cooling tower packing		
WTS S4	Assess the performance and progress of a water treatment cleaning/disinfection operation by sample analysis and make adjustments to the programme as required		

GROUP 7: (WTS) Health, Safety and the Environment

Pass Criteria

Apply a safety first approach for themselves and colleagues keeping themselves and others safe.

Undertake and document work place risk assessments and hazard reviews in accordance with company procedures.

Distinction Criteria

Challenge unsafe practice outside of their immediate control or responsibility and is proactive in resolving those practices e.g., produces a risk based chemical handling and transport procedure for delivery of chemicals to site

Ref.	Apprenticeship Standard Criteria		PORTFOLIO EVIDENCE REFERENCE (Apprentice Input)	
		1	2	3
WTS K4	Understand the risks involved, the relevant Health and Safety regulations associated with the project and specific requirements of the project site			
WTS S6	Produce a method statement and control scheme to manage the health, safety and environment during the various phases of a project		7	

Appendix E: Observation Planning Forms

Instructions

This form has two purposes:

- 1. To help you plan a practice Observation for your apprentices
- 2. To inform EUIAS of the proposed task(s) for the live assessment

The apprentice is assessed:

- in their normal place of work, under normal working conditions
- A total of 2 hours + or 12 minutes is permitted for the practical skills observation with questioning
- Equipment and resources needed for the assessment must be in good and safe working condition

The activities should be designed to assess a broad range of the skills, knowledge and behaviours developed over the period of the apprenticeship. However, as a minimum the practical skills observation must cover the activities and KSBs listed in the Planning Form below.

EUIAS offers a service to review the employer/training provider's Observation task brief.

Task variations: If you have more than one apprentice being assessed, use the 'Practical Task variations' section of the form to indicate what the task variations that will be put in place so that apprentices are not asked to complete identical tasks.

Complete the 'Observation Planning Form' and submit it to the Service Delivery team via enquiries@euias.co.uk, for **review at least 1 month before the start** of the endpoint assessment.

Water Treatment Technician pathway

Observation Planning Form

Employer name and site address	
Training provider (if applicable)	
Standard	Water Treatment Technician
Pathway	Water treatment technician
Level	3
Location of observation	
Contact Details: Employer/training provider representative, email address and contact number overseeing the setup of the practical (documents and site).	

Use the boxes below to describe the task(s). Details for the individual KSBs can be found in the reference table at the end of this form.

The water treatment technician apprentice must be observed presenting the results and recommendations of a water analysis to the customer:

The task should allow the apprentice to demonstrate:

- 1. following the relevant organisational safety requirements for their self and others
- 2. completing a risk assessment
- 3. producing a work plan/method statement
- 4. checking the requirement and correct operation of resources/equipment required
- 5. identifying suitable test or application points within the system
- 6. applying the treatment programme for the system involved
- 7. interpreting the test results
- 8. assessing the implications of the results for the treatment programme
- 9. if necessary, reporting a risk or concern in the workplace to the correct individual in the organisation
- 10. giving a presentation / demonstration of treatment recommendations or programme controls to a customer

Please describe the water treatment operation

Water Treatment Equipment Technician pathway

Observation Planning Form

Employer name and site address Training provider (if applicable)	
Standard	Water Treatment Technician
Pathway	Water treatment equipment technician
Level	3
Location of observation	
Contact Details: Employer/training provider representative, email address and contact number overseeing the setup of the practical (documents and site).	

Use the boxes below to describe the task(s). Details for the individual KSBs can be found in the reference table at the end of this form.

The water treatment equipment technician apprentice must be observed servicing a piece of water treatment equipment.

The task should allow the apprentice to demonstrate:

- 1. preparing for operation
- 2. checking equipment and conditions
- 3. identifying the water treatment equipment
- 4. carrying out operations safely
- 5. recording operations

Please identify the water treatment operations
Please identify the type of water system:
Please confirm that the task will be completed under normal working
conditions
Please state how the apprentice will have the opportunity to achieve the
following elements
Health and Safety
☐ Follow the organisational safety requirements for themselves and others,
maintaining a safe working environment and completing the task in a safe,
competent way
☐ Complete a work task risk assessment and produce a work plan/method
statement for the task(s) involved
☐ Demonstrate how they report a risk or concern in the workplace to the correct
☐ Demonstrate how they report a risk or concern in the workplace to the correct
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation S1, S2, S3, S6, B2, B4

Please state how the apprentice will have the opportunity to achieve the following elements		
Communication Skills		
☐ Communicate effectively with the customer/site personnel and other organisational staff involved with the task.		
☐ Provide clear and accurate recommendations to customer/site personnel. by discussion of the job completion report		
□ Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development e.g. by behaving responsibly on site, reducing any impact of the task on the local environment and people, minimising waste produced and using the correct routes for waste disposal.		
Statement: Statement:		

Please state how the apprentice will have the opportunity to achieve the following elements Complete Operational Tasks () ☐ Demonstrate how they check the requirement and correct operation of resources/equipment required for the task. e.g. flushing pumps are in serviceable condition ☐ Identify suitable test or application points within the system. e.g. identifies access point for external flushing pump connection ☐ Correctly apply the treatment programme for the system involved. e.g. supervises a closed system chemical flushing operation ☐ Successfully complete the servicing of a piece of water treatment equipment in accordance with company procedures and relevant equipment specifications. S7, S8, S11, WTE S3 Statement: **Performance Testing (S12)** ☐ Correctly interpret the test results and assess the implications of the results for the treatment programme. e.g. identifies the most suitable recommendations for chlorine levels during a system disinfection ☐ Service a piece of water treatment equipment e.g. dosing pump in accordance with company procedures and relevant equipment specifications and test for correct operation S12, WTE S3b, WTE S4 Statement:

Legionella Risk Assessor pathway

Observation Planning Form

Employer name and site address Training provider	
(if applicable) Standard	Water Treatment Technician
Pathway	Legionella risk assessor
Level	3
Location of observation	
Contact Details: Employer/training provider representative, email address and contact number overseeing the setup of the practical (documents and site).	

Use the boxes below to describe the task(s). Details for the individual KSBs can be found in the reference table at the end of this form.

The **legionella risk assessor** apprentice must be observed carrying out a tank inspection

The task should allow the apprentice to demonstrate:

- 1. Confirming the scope of the assessment/review
- 2. Preparing or assessment/review
- 3. Identifying equipment / plant items to be inspected
- 4. Reviewing current conditions
- 5. Assessment of risk
- 6. Completing report and verbal discussions

Please identify the water treatment operations
Please identify the type of water system:
Please confirm that the task will be completed under normal working conditions
Please state how the apprentice will have the opportunity to achieve the
following elements
Health and Safety
☐ Follow the organisational safety requirements for themselves and others,
maintaining a safe working environment and completing the task in a safe, competent way
☐ Complete a work task risk assessment and produce a work plan/method statement for the task(s) involved
☐ Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation
S1, S2, S3, S6, B2, B4 Statement:
Statement.

Please state how the apprentice will have the opportunity to achieve the following elements **Communication Skills** ☐ Communicate effectively with the customer/site personnel and other organisational staff involved with the task. ☐ Provide clear and accurate recommendations to customer/site personnel. by discussion of the job completion report ☐ Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development e.g. by behaving responsibly on site, reducing any impact of the task on the local environment and people, minimising waste produced and using the correct routes for waste disposal ☐ Demonstrate how they prepare and present report findings to the customer personnel and how they discuss with the customer how recommended remedial actions and changes to management controls identified in the risk assessment can be implemented S15, LRA S5, LRA S6, B1 Statement:

Please state how the apprentice will have the opportunity to achieve the following elements
Complete Operational Tasks ()
 □ Demonstrate how they check the requirement and correct operation of resources/equipment required for the task. e.g. flushing pumps are in serviceable condition □ Identify suitable test or application points within the system. e.g. identifies access point for external flushing pump connection □ Correctly apply the treatment programme for the system involved. e.g. supervises a closed system chemical flushing operation Statement:
Performance Testing (S12)
 □ Correctly interpret the test results and assess the implications of the results for the treatment programme. e.g. identifies the most suitable recommendations for chlorine levels during a system disinfection □ Carry out water storage tank investigation/survey in accordance with company procedures
Statement:

Water Treatment Operations Supervisor pathway

Observation Planning Form

Employer name and site address Training provider (if applicable)	
Standard	Water Treatment Technician
Pathway	Water treatment operations supervisor
Level	3
Location of observation	
Contact Details: Employer/training provider representative, email address and contact number overseeing the setup of the practical (documents and site).	

Use the boxes below to describe the task(s). Details for the individual KSBs can be found in the reference table at the end of this form.

The water treatment operations supervisor apprentice must be observed supervising a team carrying out a water treatment operation

The task should allow the apprentice to demonstrate:

- 1. supervising health and safety for a group
- 2. ensuring the competence of staff for a work task
- 3. managing a site operation
- 4. leading work tasks

Please confirm that the apprentice will be supervising a team carrying out a water treatment operation	
Size of team*	
*minimum size of team includes the apprentice plus one other person	
Please identify the water treatment operations	
□Cleaning and disinfection	
□Chemical cleaning (Pre-commissioning, flushing, remedial)	
□Other (please identify below)	
Please identify the type of water system:	
Please confirm that the task will be completed under normal working	
conditions	
Please state how the apprentice will have the opportunity to achieve the	!
following elements	
Health and Safety	
☐ Follow the organisational safety requirements for themselves and others,	
maintaining a safe working environment and completing the task in a safe,	
competent way	
☐ Complete a work task risk assessment and produce a work plan/method	
statement for the task(s) involved	
$\hfill\square$ Demonstrate how they report a risk or concern in the workplace to the corre	ect
individual in the organisation	
S1, S2, S3, S6,	B2, B4
Statement:	

Please state how the apprentice will have the opportunity to achieve the following elements
Communication Skills
☐ Communicate effectively with the customer/site personnel and other organisational staff involved with the task
☐ Provide clear and accurate recommendations to customer/site personnel. by discussion of the job completion report
☐ Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development e.g. by behaving responsibly on site, reducing any impact of the task on the local environment and people, minimising waste produced and using the correct routes for waste disposal
Statement: Statement:

Observation KSB Reference

This reference table will assist the employer and/or training provider identify the KSB.

Core Skills

- **S1.** Understand, comply with and implement statutory health and safety regulations with regard to the tasks being undertaken.
- **S2.** Understand and implement organisational safety requirements for themselves and others, including responsibility and supervision for safe access to water systems and the handling of chemicals.
- **S3.** Maintain a safe environment for other building occupants during water treatment operations including any relevant signage and notifications.
- **S6.** Complete work task risk assessments and develop work plans and method statements for the task(s) involved.
- **S7.** Ensure the suitability and correct operating condition of resources and equipment for the work tasks involved. This can include test equipment, chemical dosing equipment, water pumps and other specialised equipment.
- **S8.** Identification of suitable sampling and application points in a water system
- **\$11.** Application of water treatment programmes to specific water system types e.g. cooling towers, steam boilers, heating and chilled systems etc.
- **\$12**. Interpretation of test results and development of treatment programme improvements and recommendations
- **S15.** Communicate effectively. Use oral, written, electronic and IT based methods and systems for the accurate communication of technical information to other staff involved and all levels of site management. Review this information and agree actions with the relevant people involved. This can include the use, management and training with regard to electronic log systems for the storage of water system sampling and analytical results, practical demonstration of testing procedures and presentation of reports

Water Treatment Technician Specific Skills

WTT S3. Give presentations and demonstrations to customer/site personnel regarding treatment recommendations and control requirements

WTT S5. Organise, construct, manage and report review meetings with customers/site personnel

Water Treatment Equipment Technician Specific Skills

WTE S3. b. Service a piece of water treatment equipment

WTE S4. Assess the performance of a water system treatment programme

Legionella Risk Assessor Specific Skills

LRA S1. Carry out site/system investigations and surveys

LRA S5. Prepare and present the assessment report findings to customer/site personnel

LRA S6. Review the implementation of remedial actions recommended in the risk assessment e.g. pipework changes, insulation and review the employment of management controls e.g. temperature monitoring programmes, system analysis results

Water Treatment Operations Supervisor Specific Skills

WTS S1. Complete water system surveys and produce system diagrams appropriate for the direction and management of a cleaning/disinfection project

WTS S3. b. Service temporary operations equipment required to complete the project e.g. flushing pump stations, side stream filtration, cooling tower packing

WTS S5. Supervise a team of Water Treatment Operatives and any associated subcontractors.

Core Behaviours

- **B1.** Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development.
- **B2.** Be risk aware so as to help reduce risks by checking of information, concentration on the task, and awareness of changing circumstances on activity.
- **B4.** Be prepared to work reliably and safely and supervise the safe and effective operation of others.

Appendix F - Observation Framework Briefs

Instructions

Employers/training providers should use the relevant Framework Brief to provide information to the apprentice about the task(s) they will be completing for their observation assessment.

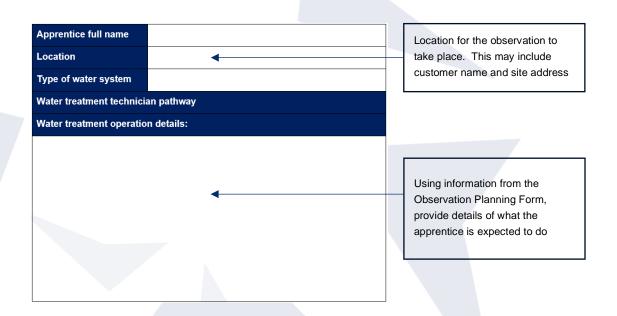

Each brief has 4 sections:

- Apprentice Information. Detail of the overarching requirements for the observation
- Assessment Requirements. Detail of the grading descriptors used to assess performance in the observation
- Underpinning Skills and Behaviours Assessed in the Observation. Detail of the individual criteria used to assess performance in the observation
- Task Details and Instructions. Outline structure of the activities that may
 expected to be seen in the task(s). The detail of the task should be provided
 by the employer. This should be taken from detail, in the Observation
 Planning Form (Appendix E), submitted to EUIAS

It is important to ensure that the table illustrated below is completed by the employer

Quick Tip – How to complete the form:

© 2024 Energy & Utility Skills

Water Treatment Technician pathway

Apprentice Information

Observation requirement	ents:
Assessment	You will be observed by an independent assessor on a
	one-to-one basis completing a task where you will be
	presenting the results and recommendations of a
	water analysis to the customer
Location	Usual place of work where you can work unhindered and
	under normal working conditions. Please see 'Task Details
	and Instructions' for further details.
	Site access for the assessor and any specific requirements
	must be advised in advance.
Questioning Requirements	During or after the task completion, 3 open questions will
	be asked to assess related underpinning knowledge and
	assess knowledge, skills and behaviours (KSBs) that did
	not naturally occur during the observation.
	Follow-up questions may be asked where clarification is
	required.
	See 'Underpinning skills and behaviours assessed in the
	observation' below, for details of the KSBs assessed in the
	observation.
Time Limits	Maximum total assessment time: 2 hours (+/- 12 minutes)
	The whole observation must take place within one day.
	Typically, the observation will be covered in one task, but
	may be covered over two separate tasks if required.
	Breaks may be taken during the observation, to allow you
	to move from one location to another. The clock will be
	paused during these breaks.
	Questioning will be completed within the total time allowed
	for the assessment.

Pass or Fail
The assessor is not allowed to give you feedback at any point. So unfortunately, they will not be able to give you any indication of your grade and whether you have passed or failed at the end.
Equipment requirements to complete the task will be dependent on the activities for the task and pathway. Provision of all equipment and resources are the responsibility of the employer and must be suitable for the task, in good safe working condition and certification where applicable, must be available for viewing such as calibration certificates, PAT tests, ladder inspections and Scafftags.
Relevant documents such as work instructions, manuals and risk assessments must be made available in hard copy or electronically to the assessor. Additional resources required to carry out the task, will be task dependent. The following provides examples but is not exhaustive:
 Personal Protective Equipment (PPE) Company documentation Identification Test equipment such as pH, conductivity, redox meters and photometers/comparators Test reagents, date checked Dip slides for microbiological testing Thermometers Timing device Test materials Sampling equipment (bottles/containers)

Observation requirements:		
	 Access equipment such as ladders and scaffolding Tools such as valve keys, spanners, tubing, binder probe, bucket, torch/light and camera 	
	Any specific equipment requirements to complete the task should be detailed in the company Method Statements and made available in hard copy or electronically to the assessor.	

Assessment Requirements

The observation will be graded according to the following specific Pass descriptors. You must meet all the descriptors, detailed below, to achieve a Pass.

Health & Safety (S1, S2, S3, S6, B2, B4)*

- Follow the organisational safety requirements for yourself and others, maintaining a safe working environment and completing the task in a safe, competent way
- Complete a work task risk assessment and produce a work plan/method statement for the task(s) involved
- Demonstrate how you report a risk or concern in the workplace to the correct individual in the organisation

Communication Skills (S15, B1, WTT S3, WTT S5)

- Communicate effectively with the customer/site personnel and other organisational staff involved with the task
- Provide clear and accurate recommendations to customer/site personnel.
 e.g. by discussion of the service report produced
- Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development e.g. by behaving responsibly on site, reducing any impact of the task on the local environment and people, minimising waste produced and using the correct routes for waste disposal
- Demonstrate the presentation or demonstration of treatment recommendations or programme controls to a customer

 Demonstrate how you organise and carry out a review meeting with a customer and that you have imparted the correct information to the relevant people e.g. identify the relevant attendees and produce an agenda for the meeting

Complete Operational Tasks (S7, S8, S11)

- Demonstrate how you check the requirement and correct operation of resources/equipment required for the task. E.g. test equipment is calibrated and reagents are in date
- Identify suitable test or application points within the system. E.g. identify sample point for closed water system
- Correctly apply the treatment programme for the system involved. E.g. identify the most suitable bleed point for a cooling system

Performance Testing (S12)

 Correctly interpret the test results and assess the implications of the results for the treatment programme. E.g. identify the most suitable recommendations for a low treatment level in a closed system

*Underpinning skills and behaviours assessed in the observation

Further guidance on each of the criteria, detailed below, is provided in the Water Treatment Technician Specification, pages 20-43.

Core/ Pathway Specific	Skills / Behaviour Statements
Core	S1. Understand, comply with and implement statutory health and safety regulations with regard to the tasks being undertaken
Core	S2. Understand and implement organisational safety requirements for themselves and others, including responsibility and supervision for safe access to water systems and the handling of chemicals
Core	S3. Maintain a safe environment for other building occupants during water treatment operations including any relevant signage and notifications

ļ	0 /		
	Core/	Skills / Behaviour Statements	
	Pathway		
	Specific		
	Core	S6. Complete work task risk assessments and develop work plans and	
		method statements for the task(s) involved	
	Core	S7. Ensure the suitability and correct operating condition of resources	
		and equipment for the work tasks involved. This can include test	
		equipment, chemical dosing equipment, water pumps and other	
	0	specialised equipment	
	Core	S8. Identification of suitable sampling and application points in a water system	
	Core	S11. Application of water treatment programmes to specific water	
		system types e.g. cooling towers, steam boilers, heating and chilled	
		systems etc.	
	Core	S12. Interpretation of test results and development of treatment	
		programme improvements and recommendations	
	Core	S15. Communicate effectively. Use oral, written, electronic and IT based	
		methods and systems for the accurate communication of technical	
		information to other staff involved and all levels of site management.	
		Review this information and agree actions with the relevant people	
		involved. This can include the use, management and training with regard	
		to electronic log systems for the storage of water system sampling and	
		analytical results, practical demonstration of testing procedures and presentation of reports	
	Coro		
	Core	B1. Act professionally demonstrating dependability, determination,	
		honesty and integrity. Respect others, act ethically and contribute to sustainable development	
	Core	B2. Be risk aware so as to help reduce risks by checking of information,

	WTT	WTT S3. Give presentations and demonstrations to customer/site	
		personnel regarding treatment recommendations and control	
		requirements	
	WTT	WTT S5. Organise, construct, manage and report review meetings with	
		customers/site personnel	

Task Details and Instructions

It is your responsibility to read the assignment carefully and to understand what is required. You can seek clarification from the Independent Assessor if unsure of the requirements.

You will be required to demonstrate the ability and take responsibility for the following activities, where appropriate:

- Supervision of health and safety of the team and other personnel who may be affected by the task
- Communicating health and safety requirements to the team
- Ensure the competence of the team for the work task e.g. training records.
- Plan and communicate the site operation to the team
- Checking and maintaining equipment, resources and working conditions during the operation
- Leading the work task and providing support to the team
- Ensure that work task risk assessments and company method statements are adhered to
- Deal promptly and effectively with problems that may arise and report any issues to the relevant people
- Complete company documentation in accordance with company operating procedures and provide the documentation to the relevant people
- Ensure the workplace is left as originally found. Supervise cleaning and storage of equipment and supervise the safe collection and disposal of any waste produced

You should prepare the following information in readiness to be provided to the assessor in advance of the observation:

- Site access / Special requirements information e.g. access arrangements/PPE
- Relevant company documentation e.g. company procedures, processes, practises, RAMS, handbooks and policies

The following detail is to be completed by the employer/training provider:

Apprentice full name

	 Access equipment such as ladders and scaffolding Tools such as valve keys, spanners, tubing, binder probe, bucket, torch/light and camera 	
	Any specific equipment requirements to complete the task should be detailed in the company Method Statements and made available in hard copy or electronically to the assessor.	

Assessment Requirements

The observation will be graded according to the following specific Pass descriptors. You must meet all the descriptors, detailed below, to achieve a Pass.

Health & Safety (S1, S2, S3, S6, B2, B4)*

- Follow the organisational safety requirements for yourself and others,
 maintaining a safe working environment and completing the task in a safe,
 competent way
- Complete a work task risk assessment and produce a work plan/method statement for the task(s) involved
- Demonstrate how you report a risk or concern in the workplace to the correct individual in the organisation

Communication Skills (S15, B1)

- Communicate effectively with the customer/site personnel and other organisational staff involved with the task
- Provide clear and accurate recommendations to customer/site personnel.
 e.g. by discussion of the service report produced
- Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development e.g. by behaving responsibly on site, reducing any impact of the task on the local environment and people, minimising waste produced and using the correct routes for waste disposal

Complete Operational Tasks (S7, S8, S11, WTE S3)

- Demonstrate how you check the requirement and correct operation of resources/equipment required for the task. E.g. have the correct equipment manual and spare parts for the task
- Identify suitable test or application points within the system. E.g. identify suitable access point for a softener installation
- Correctly apply the treatment programme for the system involved. E.g. install the most suitable dosing pump for a chemical application
- Successfully complete the servicing of a piece of water treatment equipment in accordance with company procedures and relevant equipment specifications

Performance Testing (S12, WTE S3b, WTE S4)

- Correctly interpret the test results and assess the implications of the results for the treatment programme. E.g. identify the most suitable recommendations for hardness slippage through a softener
- Service a piece of water treatment equipment e.g. dosing pump in accordance with company procedures and relevant equipment specifications and test for correct operation

*Underpinning skills and behaviours assessed in the observation

Further guidance on each of the criteria, detailed below, is provided in the Water Treatment Technician Specification, pages 20-43.

	Any specific equipment requirements to complete the task should be detailed in the company Method Statements and made available in hard copy or electronically to the assessor.

Assessment Requirements

The observation will be graded according to the following specific Pass descriptors. You must meet all the descriptors, detailed below, to achieve a Pass.

Health & Safety (S1, S2, S3, S6, B2, B4)*

- Follow the organisational safety requirements for yourself and others, maintaining a safe working environment and completing the task in a safe, competent way
- Complete a work task risk assessment and produce a work plan/method statement for the task(s) involved
- Demonstrate how you report a risk or concern in the workplace to the correct individual in the organisation

Communication Skills (S15, B1, LRA S5, LRA S6)

- Communicate effectively with the customer/site personnel and other organisational staff involved with the task
- Provide clear and accurate recommendations to customer/site personnel.
 e.g. through discussion of the risk assessment report
- Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development e.g. by behaving responsibly on site, reducing any impact of the task on the local environment and people, minimising waste produced and using the correct routes for waste disposal

 Demonstrate how you prepare and present findings to the customer personnel and how you discuss with the customer how recommended remedial actions and changes to management controls identified in the risk assessment can be implemented

Complete Operational Tasks (S7, S8, S11)

- Demonstrate how you check the requirement and correct operation of resources/equipment required for the task. E.g. know if step ladders are required for access and have access to them if required
- Identify suitable test or application points within the system. E.g. identify suitable point in system to take a microbiological sample
- Correctly apply the treatment programme for the system involved. E.g. can identify the suitable temperature monitoring points within a system

Performance Testing (S12, LRA S1)

- Correctly interpret the test results and assess the implications of the results for the treatment programme. E.g. identify the most suitable recommendations for low hot water temperature
- Carry out water storage tank investigation/survey in accordance with company procedures

*Underpinning skills and behaviours assessed in the observation

Further guidance on each of the criteria, detailed below, is provided in the Water Treatment Technician Specification, pages 20-43.

Core/ Pathway Specific	Skills / Behaviour Statements
Core	S1. Understand, comply with and implement statutory health and safety regulations with regard to the tasks being undertaken

Core	B2. Be risk aware so as to help reduce risks by checking of information, concentration on the task, and awareness of changing circumstances on activity

Core/ Pathway Specific	Skills / Behaviour Statements
Core	B4. Be prepared to work reliably and safely, and supervise the safe and effective operation of others
WTS	WTS S1. Complete water system surveys and produce system diagrams appropriate for the direction and management of a cleaning/disinfection project
WTS	WTS S3. b. Service temporary operations equipment required to complete the project e.g. flushing pump stations, side stream filtration, cooling tower packing
WTS	WTS S5. Supervise a team of Water Treatment Operatives and any associated subcontractors

Task Details and Instructions

It is your responsibility to read the assignment carefully and to understand what is required. You can seek clarification from the Independent Assessor if unsure of the requirements.

You should prepare the following information in readiness to be provided to the assessor in advance of the observation:

- Supervise health and safety for a group
- Ensure the competence of staff for a work task
- Manage a site operation
- Lead work tasks

You should prepare the following information in readiness to be provided to the assessor in advance of the observation:

- Site access / Special requirements information e.g. access arrangements/PPE
- Relevant company documentation e.g. company procedures, processes, practises, RAMS, handbooks and policies

The following detail is to be completed by the employer/training provider:

Apprentice full name				
Location				
Type of water system				
Water treatment operation	ns supervisor pathway			
Water treatment operation	Water treatment operation details:			

Appendix G: Practice Observation Templates

Employers/training providers are recommended to arrange for apprentices to carry out a practice observation prior to end-point assessment.

Instructions

This should be read in conjunction with the WTT Specification.

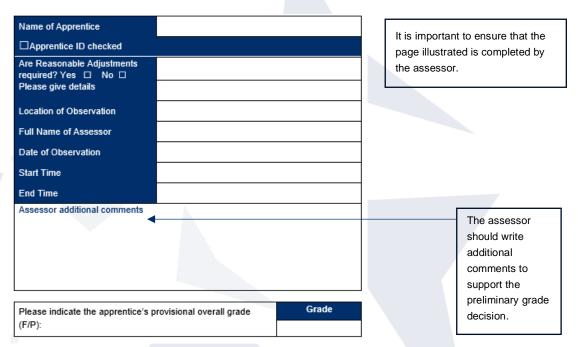

This template has been designed to help the suitable person playing part of the independent assessor and has three purposes:

- 1. To prepare for a practice assessment
- Designed to holistically assess a broad range of the skills, knowledge and behaviours developed over the period of the apprenticeship by the apprentice
- 3. To provide feedback to the apprentice in preparation for the live assessment

The assessor should:

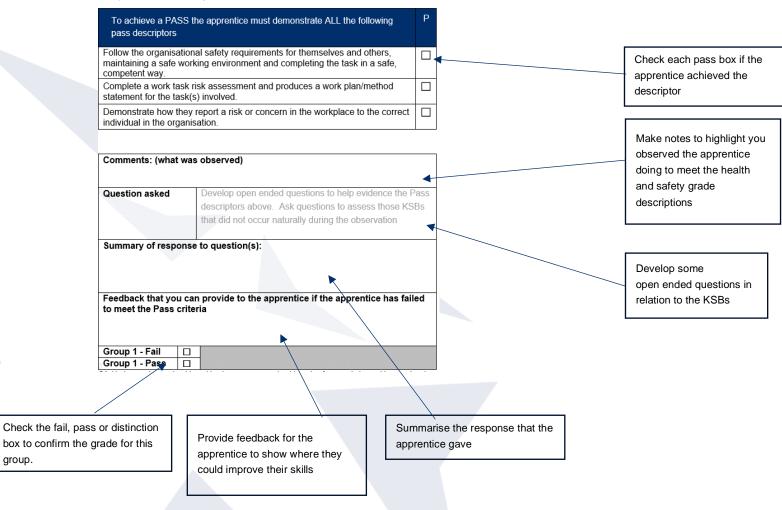

complete the form below which has two parts to assess the apprentice's observation

Quick Tip – How to complete the form below:

Group 1: Health and Safety

Water Treatment Technician Observation

Name of Apprentice		
☐ Apprentice ID checked		
Are Reasonable Adjustments required? Yes □ No □ Please give details		
Location of Observation		
Full Name of Assessor		
Date of Observation		
Start Time		
End Time		
Assessor additional comments		
		Outsile
Please indicate the apprentice's p (F/P):	rovisional overall grade	Grade

Please Note:

To achieve a Pass, the Apprentice must achieve all the pass descriptors.

Fail: the apprentice does not demonstrate all the pass descriptors.

Introduction

At the start of the practical observation the Assessor will:

- Introduce themselves
- Confirm their role
- Provide apprentice with information on the format of the observation, including the timescales they will be working to.

(The Assessor can share the grading guidance with the apprentice as this appears in the assessment plan) The apprentice will:

- Give their full name
- Their date of birth
- Their employer name
- Confirm they are prepared for the practical observation; and confirm they can continue with the practical observation.

The apprentice will be asked to show their identification to the Assessor prior to beginning the assessment

Important points to inform the apprentice

- If at any point during the practical observation you perform an unsafe act/task which contravenes Health and Safety, I will immediately stop the observation.
- Please do not judge anything by me taking notes and you should not infer anything positive or negative from how long the practical observation lasts.
- Ensure that your mobile is turned off or placed somewhere where you will not be interrupted during the practical observation.

Assessor Guidance

Delivery

Water Treatment Technician option: the apprentice must be observed presenting the results and recommendations of a water analysis to the customer.

Water Treatment Equipment Technician option: the apprentice must be observed servicing a piece of water treatment equipment.

Legionella Risk Assessor option: the apprentice must be observed carrying out a tank inspection

Water Treatment Operations Supervisor option: the apprentice must be observed supervising a team carrying out a water treatment operation.

The observation with questions must take two hours+/- 12 minutes...

During or after the task completion, 3 open questions must be asked to assess related underpinning knowledge and assess knowledge, skills and behaviours that did not naturally occur during the observation.

Follow-up questions can be asked where clarification is required. The time for questioning is included in the overall assessment time.

Answers to questions, must be documented.

Additional Questions

As only naturally occurring work is observed, those criteria that the apprentice did not have the opportunity to demonstrate can be assessed using relevant questions. Please identify any alternative questions used.

Water Treatment Technician pathway

Group 1: Health and Safety

To achieve a PASS the apprentice must demonstrate ALL the following pass descriptors		
Follow the organisational safety requirements for themselves and others, maintaining a safe working environment and completing the task in a safe, competent way.		
•	Complete a work task risk assessment and produces a work plan/method statement for the task(s) involved.	
Demonstrate how they report a risk or concern in the workplace to the correct individual in the organisation.		
Comments: (what was observed)		
Question asked	Develop open ended questions to help evidence the P descriptors above. Ask questions to assess those KSE that did not occur naturally during the observation	
Summary of response	to question(s):	
Feedback that you can to meet the Pass crite	n provide to the apprentice if the apprentice has faile ria	∍d
Group 1 - Fail		
Group 1 - Pass □		

- **S1.** Understand, comply with and implement statutory health and safety regulations with regard to the tasks being undertaken
- **S2.** Understand and implement organisational safety requirements for themselves and others, including responsibility and supervision for safe access to water systems and the handling of chemicals
- **S3.** Maintain a safe environment for other building occupants during water treatment operations including any relevant signage and notifications
- **S6.** Complete work task risk assessments and develop work plans and method statements for the task(s) involved
- **B2.** Be risk aware so as to help reduce risks by checking of information, concentration on the task, and awareness of changing circumstances on activity
- B4. Be prepared to work reliably and safely, and supervise the safe and effective operation of others

Group 2: Communication skills

To achieve a PASS the apprentice must demonstrate ALL the following pass descriptors			
Communicate effectively with the customer/site personnel and other organisational staff involved with the task			
Provide clear and accurate recommendations to customer/site personnel. e.g. by discussion of the service report produced.			
Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development e.g. by behaving responsibly on site, reducing any impact of the task on the local environment and people, minimising waste produced and using the correct routes for waste disposal			
Demonstrate the presentation or demonstration of treatment recommendations or programme controls to a customer			
Demonstrate how they organise and carry out a review meeting with a customer and that they have imparted the correct information to the relevant people e.g. identify the relevant attendees and produce an agenda for the meeting			
Comments: (what was observed)			
Question asked	Develop open ended questions to help evidence the	e

	those KSBs that did not occur naturally during the		
	observation		
Summary of response	to question(s):		
Feedback that you can provide to the apprentice if the apprentice has failed			
to meet the Pass criteria			
Group 2 - Fail			
Group 2 - Pass			

S15. Communicate effectively. Use oral, written, electronic and IT based methods and systems for the accurate communication of technical information to other staff involved and all levels of site management. Review this information and agree actions with the relevant people involved. This can

include the use, management and training with regard to electronic log systems for the storage of water system sampling and analytical results, practical demonstration of testing procedures and presentation of reports

B1. Act professionally demonstrating dependability, determination, honesty and integrity. Respect others, act ethically and contribute to sustainable development.

WTT S3. Give presentations and demonstrations to customer/site personnel regarding treatment recommendations and control requirements

WTT S5. Organise, construct, manage and report review meetings with customers/site personnel

Group 3: Complete operational tasks

To achieve a PASS the apprentice must demonstrate ALL the following pass descriptors	Р
Demonstrate how they check the requirement and correct operation of resources/equipment required for the task. e.g. test equipment is calibrated and reagents are in date.	
Identify suitable test or application points within the system. e.g. identifies sample point for closed water system.	
Correctly apply the treatment programme for the system involved. e.g. identifies the most suitable bleed point for a cooling system.	
Comments: (what was observed)

Please Note:

To achieve a Pass, the Apprentice must achieve all the pass descriptors , according to the selected job role.

To achieve a Distinction, the Apprentice must achieve all the pass descriptors plus 4 out of 6 of the distinction descriptors.

Fail: the apprentice does not demonstrate the pass descriptors

Introduction

At the start of the interview the Independent Assessor will:

- Introduce themselves
- State the date of the interview
- Request and confirm ID from the apprentice
- Provide apprentice with information on the format of the interview with questions, including the timescales they will be working to.

The apprentice will:

- Confirm their full name
- Confirm their date of birth
- Give their employer name
- Confirm their location and that no one else is present in the room, if remote apprentice to pan camera 360°
- Confirm they are prepared for the interview; and confirm they can continue with the interview
- Confirm that the evidence within the portfolio relates to the KSB's that will be assessed during the interview.

The apprentice will be asked to show their identification to the Independent Assessor prior to beginning the assessment

Important points to inform the apprentice

- Please do not judge anything by the notes being taken, nor infer anything positive or negative from how long the interview lasts
- We are not allowed to give you feedback at any point. So unfortunately, we will not be able to give you any indication of
 your grade and whether you have passed or failed at the end
- Please ensure that your mobile is switched off or somewhere where you will not be interrupted during the interview
- Sign placed on the door of the interview room. Interview in progress 'Do not disturb'
- This interview will be fully recorded for the purpose of audit and quality assurance

Assessor Guidance

Delivery

The interview will last 90 minutes.

This is an Assessor led professional discussion. You must be in full control. Time management is key! If the apprentice veers off track, they need to be reined back in

You must ask a minimum of 19 questions.

You must include distinction questions to give the apprentice the opportunity to demonstrate the KSBs to distinction grade You must ask enough questions to ensure each descriptor is achieved. There must be good evidence for each descriptor The purpose of the questions is to cover the following themes:

- Health, Safety and the Environment
- Workplace attitude
- Resource management

The following themes will be assessed in the context of the apprentice's occupational context:

- Water system surveys, water system requirements and treatment programme design
- Evaluate the water treatment programme options for an application
- Water treatment programme operational performance and assessment

The **Water Treatment Technician** occupational context does not have any additional occupationally focussed Health, Safety and the Environment questions.

The **Water Treatment Equipment** occupational context will have some occupationally focussed Health, Safety and the Environment questions.

Assessor Guidance

The **Water Treatment Operations Supervisor** occupational context will have some occupationally focussed Health, Safety and the Environment questions.

The **Water Treatment Operations Supervisor** occupational context will have some occupationally focussed Health, Safety and the Environment questions.

Please work through the sections in the order they appear within this document.

Answers to questions, must be recorded. Timeline each question to the recording. Only log the time for the start of each question asked.

Additional follow-up questions are allowed to seek clarification and to make a judgement against grading descriptors Adapt the questions to the apprentice's circumstances following your review of their portfolio evidence Supply brief written notes where each descriptor has been met

If the apprentice does not achieve a descriptor, provide written notes that you can feed back to the apprentice to help the apprentice prepare for the live Professional Discussion.

At the end of the interview -Thank the apprentice for their time and wish them good luck

Water Treatment Technician pathway

Health, Safety and the Environment

Pass Apprentices must achieve ALL the following pas descriptors		chieved	Distinction Apprentices must achieve ALL the pass descriptors plus ALL a minimum of FOUR distinction descriptors		Achieved		
Comply with company practices, processes and procedures associated with safety			Demonstrate an understanding of where to improve Health and Safety within their workplace, including actions taken e.g. where reduced hazards minimised the risk to health or improved the system integrity		Health and Safety within their workplace, including		
Demonstrate where they have contributed to the development of an operational solution to a heal safety issue							
Identify the main Health and Safety and compliand requirements of a Water Treatment Technician of Health & Safety at Work Act, L8, BS 2486, BS 8	e.g.,

CS16 Maintain level of competence commensurate with job role. Identify and recognise personal training needs and undertake suitable training when required. Complete and record CPD necessary to maintain and enhance competence

CB3 Display a self-disciplined, self-motivated, proactive approach to work, willing to make independent decisions and develop solutions and improvements to work practices

CB5 Be prepared to work effectively and efficiently maintaining good relationships with colleagues, clients, suppliers and the public.

CB6 Be receptive to feedback, willing to learn new skills and adjust to change.

CB7 Demonstrate adherence to corporate policies on ethics, equality and diversity.

Resource Management

Pass Apprentices must achi descriptors	ieve ALL the following pass	Achieved	ieved Distinction Apprentices must achieve ALL the pass descriptors plus ALL a minimum of FOUR distinction descriptors		Achieved
management of time is	e necessary site communication		Show an understanding of the importance of effective time and resource management and the implications to themselves and their employer. e.g., cost to the employer of aborted site visits, missing materials and call backs

CS5 Gather system data to enable the correct selection of operational resources that may be required e.g., access equipment (ladders, scaffold or cherry picker).

CS14 Use resources effectively including their own time management, the appropriate competence of staff chosen for the operation involved, the efficient use of staff resources and management of equipment required for specific work tasks.

Water system surveys, water system requirements and treatment programme design

Pass Apprentices must ach descriptors	ieve ALL the following pas		Achieved	Distinction Apprentices must achieve ALL the pass descriptors plus ALL a minimum of FOUR distinction descriptors		Achieved
Describe the information to be obtained during a water system survey to enable a water system cleaning programme to be planned e.g., system access points, drainage, power supply		ng		Explain the implications of selecting an unsuitable treatment option and how this could be rectified e.g., non-dynamic flushing of a multiple floor heating system		
understanding of the	y have correctly applied an water treatment requirement e.g., from the system cor rts, analytical reports	ents for a		Explain the benefits for the customer of completing the cleaning procedure e.g., improvement in heat transfer processes derived from a cleaning procedure		
Timeline reference				Portfolio reference

Fail			Pass		Distinction	

_

WTS K1 Understand the water treatment requirements of specific water systems e.g. drinking water systems, process water systems etc WTS S2 Understand and apply chemical cleaning and disinfection programmes for specific water systems

Evaluate the water treatment programme options for an application

Pass Apprentices must achieve ALL the following pass descriptors	Achieved	Distinction Apprentices must achieve ALL the pass descriptors plus ALL a minimum of FOUR distinction descriptors	Achieved		
Describe the treatment options available for a specific water treatment cleaning application e.g., removal of suspended solids from a closed system		Explain the risks and implications of failure to follow the correct cleaning programme and the likely problems that will occur. e.g., incorrect cleaning programme closing			
Describe the treatment options available for a specific water system disinfection application e.g., sodium hypochlorite versus hydrogen peroxide for mains disinfection		down production process and consequent losses to both the customer and the employer

Summary of responses					

Feedback for the apprentice		

WTS K2a Understand chemical cleaning programme options for specific water systems and processes WTS K2b Understand disinfection programme options for specific water systems and processes

Water treatment programme operational performance and assessment

Pass Apprentices must achieve ALL the following pass descriptors	Achieved		eve ALL the pass descriptors plus UR distinction descriptors	Achieved	
Describe the correct performance criteria for the operation type, the tests to be completed and the correct equipment to be used when performing this task e.g., iron levels during a dynamic flushing operation		Explain the risks and implications of poor cleaning operation performance. e.g., incorrect cleaning programme closing down production process and consequent losses Demonstrate an understanding of the potential improvements that could be made to the water treatment programme on a cleaned system e.g. side stream filtration to remove suspended solids			
Describe how they have installed and commissioned operational equipment.					
Demonstrate the evaluation and implementation process that has been completed and explain the conclusions arrived at e.g., by explanation of the job completion report					
Timeline reference		Portfolio reference

	Summary of responses
-	Feedback for the apprentice

CS9 Assessment of relevant test parameters and sampling plan for specific water systems

CS10 Performance assessment and evaluation of water system conditions and operations utilising specific monitoring equipment CS13 Identify, evaluate and resolve practical and technical problems encountered, assess suitability of the chemical and physical water treatment options employed and implement the required improvements to the treatment programme or service delivery WTS K3 Acquire the knowledge required to assess the performance of water treatment cleaning/disinfection operation WTS S3a Install and commission temporary operations equipment required to complete the project e.g. flushing pump stations, side stream filtration, cooling tower packing

WTS S4 Assess the performance and progress of a water treatment cleaning/disinfection operation by sample analysis and make adjustments to the programme as required
